25X1

Troop trains observed on 2 and 5 September 1954 included:

<u>Date in September</u>	<u>Number of Trains</u>	<u>From</u>	<u>To</u>
2	1	Wallern	Stadlau; via Bruck on the Leitha River
	3	Goepfritz	Eisenstadt; via Bruck on the Leitha River
5	1 with new trucks	Hagyeshalom	toward Bruck on the Leitha River

1. Comment. Wallern is listed as entraining station for the Apetlon AAA Range, and Stadlau has been used repeatedly as entraining station for units from Vienna-Kagran. The troop train possibly carried JS tanks which were observed during the last ten days of August 1954 at Apetlon and returned to Kagran, home station of the 106th Gds Hv Tk SP Regt.

25X1

2. Comment. Goepfritz is the entraining station of the Doellersheim troop training grounds; Eisenstadt is the home station of the 284th Gds Mtz Rifle Regt. The bulk of the regiment was believed to be stationed at the troop training grounds during the period of observation. The troop trains probably carried elements of the regiment back to Eisenstadt.
